

ANATOLI TREBKO

Frontend Developer

Minsk, Belarus • Open to remote • +375 25 737 5381 • toliktrebko@gmail.com • [LinkedIn](#) • [Habr Career](#) • [Telegram](#)

SUMMARY

Frontend developer with 3+ years of commercial experience delivering responsive, high-performance web applications. Specialized in Vue 3 / Nuxt and React / Next.js with TypeScript. Track record of measurable impact: improved app performance by 30%, accelerated data loading by 80%, and shipped 10+ production features across e-commerce, real estate, and SaaS domains. Effective collaborator across design, backend, and QA teams; strong problem-solver who takes ownership of features end-to-end and translates ambiguous requirements into shipped product.

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, SQL

Frameworks: Vue 3, Nuxt 3/4, React, Next.js, Node.js, Express, Framer Motion, GSAP

Styling: SCSS, TailwindCSS, CSS3, responsive design, semantic HTML, pixel-perfect implementation

Tools & Platforms: Git, REST APIs, Stripe, Webflow, MySQL, PostgreSQL, Drizzle ORM, Pabbly, Kommo CRM

Practices: performance optimization, SEO, cross-browser compatibility, refactoring, code review, agile collaboration

EXPERIENCE

Frontend Developer — Slowdive

Mar 2025 — May 2025

Moscow, Russia (Remote)

- Developed and maintained interactive web quizzes; delivered cross-browser responsive layouts and reduced page-load times for higher user engagement.
- Designed and shipped the User Account interface, covering subscription management, payment status, and account flows used by 100% of registered users.
- Developed and integrated a billing system: implemented payment flows, subscription lifecycle management, and transaction status processing.
- Designed the project's SCSS architecture: built a scalable system of variables, mixins, and component-level styles to support long-term maintainability.
- Refactored project codebase to a modular architecture, cutting average feature-delivery time and simplifying onboarding for new contributors.
- Collaborated with designers, backend engineers, and QA to scope, build, and ship features within sprint deadlines.

Saint Petersburg, Russia (Remote)

- **Astek (print & branding):** redesigned the corporate site and built a 15-parameter pricing calculator with PDF quote generation, reducing manual quote preparation time by ~70% and removing pricing errors.
- Implemented an admin panel enabling non-technical managers to update materials and services without developer involvement.
- **Island Home Phuket (real estate):** took over an unfinished project, stabilized the codebase, and shipped to production within 6 weeks.
- Extended the platform with a dynamic property catalog and blog module; integrated Kommo CRM via Pabbly, automating 100% of inbound leads.
- Built an internal analytics dashboard visualizing sales and a 122-property portfolio, replacing manual Excel reporting and enabling data-driven decisions.
- **Cycle Dev:** owned the UI implementation focused on Lighthouse performance, SEO, and responsiveness across devices.

Stack: TypeScript, React, Next.js, Vue 3, Nuxt, TailwindCSS, SCSS, Webflow**Junior Frontend Developer — Zapoluj na Wakacje**

May 2023 — Apr 2024

Warsaw, Poland

- Refactored core application code, improving overall performance by 30% and reducing TTI on slow connections.
- Optimized MySQL queries and schema, accelerating data loading by 80% on the heaviest pages.
- Achieved 98% pixel-perfect accuracy against design mockups across all delivered pages.
- Integrated Stripe payments end-to-end and built backend services on Node.js, Express, and Nodemailer for transactional email.
- Developed custom UI animations with Framer Motion; introduced form validation and notification systems that lowered support tickets.
- Tested, debugged, and maintained production stability while contributing to architecture decisions for new features.

Stack: React, JavaScript, TypeScript, SCSS, HTML, Node.js, Express, MySQL**HIGHLIGHTS**

- 10+ production features shipped across e-commerce, real estate, fintech, and SaaS clients.
- Strong communicator across cross-functional and remote teams; comfortable taking ownership and unblocking peers.
- Continuous learner — actively expanding into fullstack work with PostgreSQL, Drizzle ORM, and 3D web (Three.js).
